

King Tao Jason NG

PROFILE SUMMARY

Senior Data Scientist and Analytics Leader with 10+ years' experience delivering analytics, machine learning, and market surveillance solutions within financial regulation. Proven track record leading cross-functional teams, deploying NLP and detection systems, and translating complex regulatory requirements into scalable data platforms.

PERSONAL INFORMATION

Citizenship: **Australian**
Languages: **English, Chinese**

CORE COMPETENCIES

- Advanced Analytics & Market Surveillance
- Machine Learning & NLP
- Data Governance
- Data Platform Strategy
- Stakeholder & Executive Engagement

EXPERIENCE

SENIOR DATA SCIENTIST <i>Data Analytics and AI, ASIC</i>	Jul 2022 - Present
◊ Led end-to-end delivery of ML and NLP initiatives, including the Licensing ML Proof of Concept, Knowledge Management Metadata Extraction, and Lessons Learned Lite Review.	
◊ Delivered Lessons Learned Lite Review and nominated for the <i>Australia Day Achievement Award</i> .	
SENIOR DATA SCIENTIST (SECONDMENT) <i>Superannuation & Life Insurance, ASIC</i>	Sep 2025 - Feb 2026
◊ Implemented a red-flag detection system for superannuation funds, strengthening risk oversight and earning high praise from the Superannuation & Life Insurance team.	
SESSIONAL TEACHING ACADEMIC <i>School of Computing, Macquarie University</i>	Feb 2022 - Jun 2022
◊ Led and tutored a coursework for Document Processing and Semantic Technologies (COMP3220), guiding students through complex concepts and practical applications.	
SENIOR ANALYTICS PLATFORM OWNER <i>Chief Data and Analytics Office, ASIC</i>	Jul 2021 - Jul 2022
◊ Directed the promotion and management of Databricks, RStudio Servers, Python Servers, and the Data Science Lab, designing onboarding strategies, workflows, and best practices to boost efficiency and collaboration among data analysts.	
DATA SCIENTIST <i>Chief Data and Analytics Office, ASIC</i>	Oct 2019 - Jul 2021
◊ Developed and deployed NLP Prospectuses, leveraging NLP to enhance prospectus analysis and provide actionable insights to the Corporation team.	
DATA SCIENTIST <i>School of Computer Science, University of Sydney</i>	Aug 2017 - Jun 2019
◊ Designed and developed a Researcher Collaboration Recommendation System using Python and D3.js, enabling data-driven networking through interactive visualizations.	
◊ Invited to present at the <i>16th Australasian Data Mining Conference</i> .	
ANALYST <i>Market Infrastructure, ASIC</i>	Jul 2016 - Oct 2019
◊ Proposed and implemented Wash Trade Detection analytics using KDB+/Q, strengthening market surveillance and regulatory compliance.	
◊ Received excellent feedback from senior management.	
MARKET TECHNOLOGY ANALYST <i>Market & Participant Supervision, ASIC</i>	Jan 2013 - Jul 2016
◊ Led the development and launch of the <i>Market Analysis and Intelligence Surveillance System</i> , enhancing market integrity.	
◊ Earned the <i>Australia Day Achievement Award</i> for outstanding accomplishment.	

TECHNICAL STACK

- Python, R, C/C++, KDB+/Q
- Databricks, Elastic Stack, Power BI
- Bayesian Methods, Statistics

ACHIEVEMENTS

- **Australia Day Achievement Award** — ASIC
- **ARI Award** — Aristocrat Technologies Australia
- **Competent Communicator** — Toastmasters International

INTRANET PROGRAMMER

Information and Communications Technology, Scots College

Oct 2011 - Dec 2011

- ◊ Oversaw the maintenance and management of IBM DB2, ensuring database reliability, performance, and security.

DOMAIN ANALYST

Mar 2011 - May 2011

Wagering Technology, Tabcorp Holdings Limited

- ◊ Led and managed requirements gathering for the Customer Loyalty Project, ensuring alignment with business objectives and stakeholder needs.

SOFTWARE ENGINEER

Jul 2008 - Mar 2011

Studio Development, Aristocrat Technologies Australia

- ◊ Designed and developed gaming applications using C and C++, creating engaging user experiences.

GRADUATE SOFTWARE ENGINEER

Jul 2007 - Jul 2008

Platform Development, Aristocrat Technologies Australia

- ◊ Designed and developed networking protocols for casino management systems using C and C++, ensuring secure and efficient communication across the platforms.

- ◊ Successfully proposed a third-party licensing initiative to the executive team, leading to the development of JAW gaming the following year.

GRADUATE TEST ENGINEER

Jan 2007 - Jul 2007

Software Integrity Testing, Aristocrat Technologies Australia

- ◊ Developed comprehensive test plans and performed unit and integration testing to ensure high-quality, reliable software delivery.

EDUCATION

MASTER OF RESEARCH, Macquarie University

Jul 2021 - Oct 2023

- ◊ Identifying Causal Directions from Text: Unsupervised Learning using Bayesian Framework

MASTER OF DATA SCIENCE, University of Sydney

Mar 2016 - Jul 2019

- ◊ Academic Capability Mapping

MASTER OF ECONOMICS, University of Sydney

Mar 2008 - Jul 2012

MASTER OF INFORMATION TECHNOLOGY, UNSW

Jul 2005 - Dec 2007

BACHELOR OF SCIENCE, UNSW

Jul 2001 - Mar 2005

PUBLICATIONS

Exploring Causal Directions through Word Occurrences: Semi-supervised Bayesian Classification Framework, **King Tao Jason Ng** and **Diego Mollá**. *The 21st Annual Workshop of the Australasian Language Technology Association, Melbourne, VIC, Australia, November 29 - December 1, 2023*

Hierarchical Word Mover Distance for Collaboration Recommender System, **Chao Sun**, **King Tao Jason Ng**, **Philip Henville** and **Roman Marchant**. *The 16th Australasian Data Mining Conference, AusDM 2018, Bathurst, NSW, Australia, November 28 - 30, 2018, Revised Selected Papers*
