## King Tao Jason NG

#### **PROFILE SUMMARY**

I am an experienced data scientist with expertise in data science, machine learning, natural language processing, and software engineering, with a strong focus on ensuring compliance with financial market regulations.

### **CONTACT DETAILS**

⊠ jason.kingtao.ng@gmail.com LinkedIn jasonkng Github kingtaojasonng

### PERSONAL INFORMATION

Citizenship: **Australian** Languages: **English, Chinese** 

### **SKILLS**

- Leadership, People Management
- Project Management, Business Analysis, Vendor Management
- Data Governance
- Machine Learning, Statistics, Natural Language Processing
- Software Engineering,
   Software Quality Assurance
- Databricks, Elastic Stack, Microsoft Power Bl
- Python, R, C, C++, KDB+/Q

### EXPERIENCE

SENIOR DATA SCIENTIST Chief Data and Analytics Office, ASIC Jul 2022 - Present

- ♦ Led the implementation of the Licensing ML Proof of Concept, Knowledge Management Metadata Extraction, and Lessons Learned Lite Review
- ♦ Supervised and mentored data analysts, fostering professional growth and skill development
- ♦ Provided leadership in the ML framework, ensuring best practices in analytics and machine learning

SESSIONAL TEACHING ACADEMIC
School of Computing, Macquarie University

Feb 2022 - Jun 2022

⋄ Tutored and led coursework for Document Processing and Semantic Technologies (COMP3220)

SENIOR ANALYTICS PLATFORM OWNER Chief Data and Analytics Office, ASIC

Jul 2021 - Jul 2022

- ♦ Led the promotion and management of Databricks, RStudio Servers, Python Servers, and the Data Science Lab, ensuring optimal performance
- Proposed the Databricks roadmap, outlining onboarding strategies, workflow setup, and best practices to enhance efficiency and collaboration among data analysts

DATA SCIENTIST Chief Data and Analytics Office, ASIC Oct 2019 - Jul 2021

 $\diamond$  Led the development and implementation of NLP Prospectuses, leveraging NLP to extract insights and improve document analysis

DATA SCIENTIST Aug 2017 - Jun 2019 School of Computer Science, University of Sydney

Designed and developed a Researcher Collaboration Recommendation
 System using Python and D3.js, enabling data-driven connections and enhancing research networking through interactive visualizations

ANALYST

Market Infrastructure, ASIC

Jul 2016 - Oct 2019

- ♦ Proposed and implemented a Wash Trade Detection system using KDB+/Q, enhancing market surveillance and regulatory compliance
- Designed and developed a Market Data Analytics Hub using the Elastic Stack, enabling real-time data analysis and improved decision-making

ANALYST **Jan 2013 - Jul 2016**Market & Participant Supervision, ASIC

- ♦ Led the development and implementation of a Market Analysis and Intelligence Surveillance System, improving market cleanliness
- ♦ Drafted the comprehensive Technology and Analytics Capability Review, assessing current capabilities and identifying opportunities in data analytics

#### **ACHIEVEMENTS**

- Australia Day Achievement Award, ASIC, Launched Market Analysis and Intelligence Surveillance System
- ARI Award, Aristocrat Technologies Australia
- Competent Communicator, Toastmasters International

## INTRANET PROGRAMMER

Oct 2011 - Dec 2011

Information and Communications Technology, Scots College

♦ Oversaw the maintenance and management of IBM DB2, ensuring database reliability, performance, and security

# DOMAIN ANALYST Mar 2011 - May 2011 Wagering Technology, Tabcorp Holdings Limited

♦ Led and managed requirements gathering for the Customer Loyalty Project, ensuring alignment with business objectives and stakeholder needs

## SOFTWARE ENGINEER **Jul 2008 - Mar 2011**Studio Development, Aristocrat Technologies Australia

♦ Designed and developed gaming applications using C and C++, creating engaging user experiences

## GRADUATE SOFTWARE ENGINEER **Jul 2007 - Jul 2008**Platform Development, Aristocrat Technologies Australia

 Designed and developed networking protocols for casino management systems using C and C++, ensuring secure and efficient communication across the platform

# GRADUATE TEST ENGINEER **Jan 2007 - Jul 2007**Software Integrity Testing, Aristocrat Technologies Australia

 Developed comprehensive test plans and executed unit and integration tests, ensuring high-quality software delivery and system reliability

## **EDUCATION**

MASTER OF RESEARCH, Macquarie University Jul 2021 - Oct 2023

♦ Thesis titled Identifying Causal Directions from Text: Unsupervised Learning using Bayesian Framework

MASTER OF DATA SCIENCE, University of Sydney Mar 2016 - Jul 2019

⋄ Thesis titled Academic Capability Mapping

MASTER OF ECONOMICS, University of Sydney
Mar 2008 - Jul 2012
MASTER OF INFORMATION TECHNOLOGY, UNSW
Jul 2005 - Dec 2007
BACHELOR OF SCIENCE, UNSW
Jul 2001 - Mar 2005

#### **PUBLICATIONS**

Exploring Causal Directions through Word Occurrences: Semisupervised Bayesian Classification Framework, **King Tao Jason Ng** and Diego Mollá. The 21st Annual Workshop of the Australasian Language Technology Association, Melbourne, VIC, Australia, November 29 -December 1, 2023

Hierarchical Word Mover Distance for Collaboration Recommender System, Chao Sun, **King Tao Jason Ng**, Philip Henville and Roman Marchant. The 16th Australasian Data Mining Conference, AusDM 2018, Bathurst, NSW, Australia, November 28 - 30, 2018, Revised Selected Papers
