

King Tao Jason Ng

PROFILE SUMMARY

Senior regulatory analytics professional with 10+ years' experience delivering strategic advice and data-driven insights across financial markets supervision. Proven ability to assess complex regulatory issues, influence supervisory strategy, and translate legislative and policy requirements into actionable regulatory frameworks. Extensive experience engaging with senior stakeholders to support evidence-based decision-making, identify emerging risks, and delivering outcomes that enhance market integrity and regulatory effectiveness.

Citizenship: **Australian**
Languages: **English, Chinese**

EXPERIENCE

◇ DUTIES ★ KEY ACHIEVEMENTS

SENIOR DATA SCIENTIST

Jul 2022 - Present

Data Analytics and AI, ASIC

- ◇ Led the design and delivery of advanced analytics solutions such as ML and NLP to inform regulatory strategy, enabling identification of emerging risks and supporting evidence-based supervisory decision making.
- ◇ Prepared briefings and analytical insights used in senior leadership forums to inform regulatory priorities and interventions.
- ◇ Mentored team members to build analytics capability aligned with ASIC's data strategy.

★ Delivered Lessons Learned Lite Review and nominated for the *Australia Day Achievement Award*.

SENIOR DATA SCIENTIST (SECONDMENT)

Sep 2025 - Feb 2026

Superannuation & Life Insurance, ASIC

- ◇ Designed and implemented a risk-based red-flag detection framework for superannuation funds, supporting proactive supervision and informing regulatory interventions.

SESSIONAL TEACHING ACADEMIC

Feb 2022 - Jun 2022

School of Computing, Macquarie University

- ◇ Led and tutored a coursework for Document Processing and Semantic Technologies (COMP3220), guiding students through complex concepts and practical applications.

SENIOR ANALYTICS PLATFORM OWNER

Jul 2021 - Jul 2022

Chief Data and Analytics Office, ASIC

- ◇ Led enterprise adoption of analytics platforms (i.e., Databricks and RStudio), improving data accessibility, standardising workflows, and enabling broader adoption of data practices.

DATA SCIENTIST

Oct 2019 - Jul 2021

Chief Data and Analytics Office, ASIC

- ◇ Developed NLP Prospectuses, which reduces document review time by significant amount and provides actionable insights to the Corporation team.

DATA SCIENTIST

Aug 2017 - Jun 2019

School of Computer Science, University of Sydney

- ◇ Designed and developed Researcher Collaboration Recommendation System, enabling data-driven networking through interactive visualizations.

★ Invited to present at the *16th Australasian Data Mining Conference*.

ANALYST

Jul 2016 - Oct 2019

Market Infrastructure, ASIC

- ◇ Proposed and implemented Wash Trade Detection analytics using KDB+/Q, strengthening market surveillance capabilities and improving identification of suspicious trading behaviour.

★ Successfully identified a confirmed wash trading case using Wash Trade Detection analytics

MARKET TECHNOLOGY ANALYST

Jan 2013 - Jul 2016

Market & Participant Supervision, ASIC

- ◇ Led the development and launch of the *Market Analysis and Intelligence Surveillance System*, enhancing market integrity.

★ Earned the *Australia Day Achievement Award* for outstanding accomplishment.

CORE COMPETENCIES

- Advanced Analytics & Market Surveillance
- Machine Learning & NLP
- Data Governance
- Data Platform Strategy
- Stakeholder & Executive Engagement

AWARDS

- **Australia Day Achievement Award** — ASIC
- **ARI Award** — Aristocrat Technologies Australia
- **Competent Communicator** — Toastmasters International

TECHNICAL STACK

- Python, R, C/C++, KDB+/Q
- Databricks, Elastic Stack, Power BI
- Bayesian Methods, Statistics

INTRANET PROGRAMMER

Oct 2011 - Dec 2011

Information and Communications Technology, Scots College

◇ Oversaw the maintenance and management of IBM DB2, ensuring database reliability, performance, and security.

DOMAIN ANALYST

Mar 2011 - May 2011

Wagering Technology, Tabcorp Holdings Limited

◇ Led and managed requirements gathering for the Customer Loyalty project, ensuring alignment with business objectives and stakeholder needs.

SOFTWARE ENGINEER

Jul 2008 - Mar 2011

Studio Development, Aristocrat Technologies Australia

◇ Designed and developed gaming applications using C and C++, creating engaging user experiences.

★ Successfully developed *Peeking Duck*, which received highly positive feedback from gaming floors.

GRADUATE SOFTWARE ENGINEER

Jul 2007 - Jul 2008

Platform Development, Aristocrat Technologies Australia

◇ Designed and developed networking protocols for casino management systems using C and C++, ensuring secure and efficient communication across the platforms.

★ Successfully proposed a third-party licensing initiative to the executive team, leading to the development of *JAW* gaming the following year.

GRADUATE TEST ENGINEER

Jan 2007 - Jul 2007

Software Integrity Testing, Aristocrat Technologies Australia

◇ Developed comprehensive test plans and performed unit and integration testing to ensure high-quality, reliable software delivery.

EDUCATION

MASTER OF RESEARCH, Macquarie University

Jul 2021 - Oct 2023

★ Identifying Causal Directions from Text: Unsupervised Learning using Bayesian Framework

MASTER OF DATA SCIENCE, University of Sydney

Mar 2016 - Jul 2019

★ Academic Capability Mapping

MASTER OF ECONOMICS, University of Sydney

Mar 2008 - Jul 2012

MASTER OF INFORMATION TECHNOLOGY, UNSW

Jul 2005 - Dec 2007

BACHELOR OF SCIENCE, UNSW

Jul 2001 - Mar 2005

PUBLICATIONS

Exploring Causal Directions through Word Occurrences: Semi-supervised Bayesian Classification Framework, **King Tao Jason Ng** and Diego Mollá. *The 21st Annual Workshop of the Australasian Language Technology Association, Melbourne, VIC, Australia, November 29 - December 1, 2023*

Hierarchical Word Mover Distance for Collaboration Recommender System, Chao Sun, **King Tao Jason Ng**, Philip Henville and Roman Marchant. *The 16th Australasian Data Mining Conference, AusDM 2018, Bathurst, NSW, Australia, November 28 - 30, 2018, Revised Selected Papers*
